DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 12, 2003 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Drawings

3. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on September 30, 2002 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.
4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "second and third cylindrical members are formed as one piece" recited in claim 9 and the "third and fourth

Art Unit: 3752

cylindrical members are formed as one piece" recited in claim 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The application, as originally filed, does not appear to disclose the "second and third cylindrical members are formed as one piece" recited in claim 9 and the "third and fourth cylindrical members are formed as one piece" recited in claim 10.

Claim Rejections - 35 USC § 102

7. Claims 1, 3 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by DeLuca (6,007,000).

Art Unit: 3752

With respect to claim 1:

DeLuca discloses a fuel injector comprising:

a nozzle body having a needle valve 11, and a tubular sleeve portion 21;

a first cylindrical member 10;

a second cylindrical member 8;

a third cylindrical member 6, 18;

a fourth cylindrical member 3;

wherein a gap between the third cylindrical member 6, 8 and the tubular sleeve portion 21 is smaller than a gap between the fourth cylindrical member 3 and the tubular sleeve portion 21.

With respect to claim 3:

DeLuca further discloses cutaways (cutaways forming the conical surface of element 18).

With respect to claim 9:

Element 8 is considered to represent the second and third cylindrical members.

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over DeLuca (6,007,000).

DeLuca discloses the claimed invention except for third and fourth cylindrical members are formed as one piece. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided an integral third and fourth cylindrical members, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *In re Larson*, 340 F.2d 965, 968, 144 USPQ 347, 349 (CCPA 1965).

Response to Arguments

10. Applicant's arguments with respect to claims 1, 3, 9 and 10 have been considered but are moot in view of the new ground(s) of rejection.
